DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a. Species I (Claims 1-30) directed toward a method for depositing an epitaxial Ge-containing layer, comprising contacting the single crystal Si structure with a surface active compound during at least a portion of the cooling time period.

b. Species II (Claims 31-36) directed toward a method for forming a strained semiconductor layer over a substrate, comprising: depositing a relaxed epitaxial SiGe alloy layer onto the relaxed epitaxial Ge layer, the relaxed SiGe alloy layer having an increasing Si content with distance from an interface with the relaxed epitaxial Ge layer.

c. Species III (Claims 64-73) directed toward a method for depositing an epitaxial Ge layer, comprising contacting the single crystal semiconductor surface with a surface active compound selected from the group consisting of Si precursors and Ge precursors during at least a portion of the cooling time period.

d. Species IV (Claims 74-77) directed toward a method for depositing an epitaxial Ge layer, comprising cooling the single crystal Si substrate to a second temperature of about 450°C. or less during a cooling time period, the reactor having a reactor pressure in the range of about 1 Torr to about 100 Torr during cooling time period.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2818

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
